

Solid Waste and Recycling Collection Fees

At its June 26, 2018 meeting, the Troutdale City Council approved a rate adjustment requested by Waste Management after a third-party financial analysis was conducted. The new rates will be effective on July 1, 2018. This is the first rate increase since 2014, and is due in large part to the recent limits on the import of recyclables imposed by China that has caused disruptions in global recycling markets. Commercial and residential services will be impacted; residential rates will increase a total of \$2.55 per month for garbage, recycling, and yard debris combined. Please read the July/August Champion recycling article for additional background, and visit [Waste Management's rate page](#) to view the entire rate schedule.
